

BelHealth relocates headquarters to New York City and opens new office in Newport Beach, California

New York – May 15, 2012 – BelHealth Investment Partners LLC (“BelHealth”) is moving its headquarters from Port Washington, NY to midtown Manhattan and opened a new office in Newport Beach, California.

The New York City office is located in the Tower 56 building at 126 East 56th Street, making BelHealth more easily accessible to prospective portfolio companies and limited partners. BelHealth expects to move into the new space by June 1, 2012.

The California office is located at 4100 Newport Place, Newport Beach, California. Aside from providing BelHealth a presence on both coasts, the office provides local presence to the California market which is home to many small and mid-sized healthcare companies that fit BelHealth’s investment criteria. Dennis Drislane, Chairman of BelHealth’s Operating Committee, along with a few members of the Operating Committee and board members of BelHealth portfolio companies will be based in our southern California office.

Harold S. Blue, Managing Partner, said, “The team is looking forward to moving to New York City. It will enable more opportunities to meet face-to-face with investment prospects. Also, California is one of BelHealth’s major target geographies for deal sourcing, and it was important for us to establish a permanent presence there with our west coast partners.”

About BelHealth Investment Partners

BelHealth Investment Partners is a private equity buyout firm focused exclusively on the small-cap healthcare industry. BelHealth acquires majority positions in healthcare companies that the BelHealth Team believes are undervalued or undermanaged and would benefit from the vast entrepreneurial and operating experience that BelHealth can deliver. BelHealth’s target sectors within healthcare include Healthcare Services, Healthcare Information Technology and Healthcare Products and Distribution. The fund typically invests between \$10 – 25 million per platform company. Applying an active, hands-on approach to governance, BelHealth utilizes its experience to drive revenue and profit growth and achieve superior returns for its investors.
